* Your Loan Debt: You must repay money that you borrow as student loans to pay for this program, including interest. You must repay any portion of the money you borrow to pay for this program, even if you fail to complete or drop out of the program. Failure to repay student loans is likely to have a serious negative effect on your credit, future earnings, and your ability to obtain future student loans.

** The federal FY18 official cohort default rate is calculated by dividing the number of student borrowers who entered into repayment between October 1, 2017 and September 30, 2018, and defaulted by September 30, 2020, by the number of student borrowers who entered repayment during that same period.

*** The graduation rate is calculated based on the number of students who received a credential in the calendar years of 2019 and 2020 divided by the number of students who enrolled during that same time period. The graduate placement rate is calculated based on those students who graduated from a program in the calendar years of 2019 and 2020 and were placed within 180 days from the end of each calendar year. The graduate placement formula published in 940 CMR 31.00 does not allow for Lincoln Technical Institute to remove graduates from the calculation including, but not limited to, those who continue their education at another institution of higher education or have health conditions that would preclude them from working.

Employment statistics substantiating these placement rates are available for inspection on request.

Lincoln Tech has no existing agreement with employers to provide jobs to students and does not guarantee employment.
